

Prompt 1 - Frontend Design Skill Installation

I want you to install the “frontend-design” skill in the project so we can use it to create websites and dashboards. You find it here: <https://github.com/anthropics/skills/tree/main/skills/frontend-design>

Prompt 2 - Website Creation

I want to build a professional single-page service website using the "frontend-design" skill. I have answered a questionnaire with all the information about my business. Please use my answers to write all the copy, create all the section titles, and build a complete index.html website. Make it mobile responsive. Make sure this Calendly Link is included and working:

```
<!-- Calendly link widget begin -->
<link href="https://assets.calendly.com/assets/external/widget.css" rel="stylesheet">
<script src="https://assets.calendly.com/assets/external/widget.js" type="text/javascript"
async></script>
<a href="" onclick="Calendly.initPopupWidget({url:
'[ENTER_YOUR_CALENDLY_URL_HERE]'});return false;">Schedule time with me</a>
<!-- Calendly link widget end -->
```

Prompt 3 - Website Deployment

You got access to my cloud server [\[ENTER_YOUR_IP_ADDRESS\]](#). You find the Login data in the .env file so please also deploy the website. The domain we use is [\[ENTER_YOUR_DOMAIN_HERE\]](#). A DNS record connecting Domain and Server is already setup.

Prompt 4 - Integrating Stripe

I want you to include a new section into the website, where People can directly pay a complete AI assessment of their business. The checkout should be done via Stripe (Test Mode for now). Read the Stripe documentation: <https://docs.stripe.com/building-with-llms> so you know how to do that. The Stripe API Key is provided in the .env file.

Prompt 5 - SEO Audit Skill

Install that skill in the project so we can find out how to improve the SEO of my website: <https://github.com/AgriciDaniel/claude-seo/blob/main/skills/seo-audit/SKILL.md>

Prompt 6 - Improve the SEO of our Website

I want you to do all the SEO recommendations for me. If possible also do the compression of the images. Write me a detailed List of anything that I need to do. Make sure that the design of the website doesn't get destroyed and that the content after the SEO changes still makes sense and sounds good. You have access to my server so also check everything there such as Nginx etc.
